## Self-service portal

You may use Self Service portal for Leave and Travel requests, and Personal Information updates. To access the application your presence at the office or VPN access is required.

NC Self-service

A user guide can be found here.

## Types of Leaves

Leave registration in Self-service is used to request and get approval for all types of leave that require approval from either your manager or HR. Self-service application knows who should approve each leave type.

Once your request has been approved the leave will be automatically registered with Timereg and Staffing. If the leave needs to be changed once approved, you need to cancel the original request and create a new request. The original request will have used your balance, so it needs to be cancelled before you can 'reuse' the balance.

To declare any type of Leave, you need to ensure that you have **first cancelled** your plan for the specific days on **MyPlanner** application.

**The case of sickness is not included in the above process, please scroll down to find out more.**
